Business Analyst | Bridging AI Technology & Multi-Million-Dollar Business Outcomes

nurrali786@gmail.com | +1 (236) 508-4786 | linkedin.com/in/nur786 | www.nuresu.me | Port Coquitlam, BC Canada

Senior Business Analyst driving digital transformation across retail and financial services since 2005. Recently delivered a multi-million-dollar AI personalization initiative at lululemon and led an enterprise architecture revamp serving millions of guests. Expert at translating complex stakeholder needs into scalable technical solutions within Agile/SAFe frameworks, with a track record of zero-downtime migrations and measurable business impact.

● KEY IMPACT

- Multi-million-dollar revenue via AI product highlights
- \$500K+ annual savings from paperless banking
- Enterprise architecture revamp — 40% faster page loads
- Zero data loss on core banking migration

● CORE SKILLS

Leadership & Analysis

BA Mentorship & Team Leadership · Backlog Management & Prioritization · Stakeholder Collaboration · Data Analysis · Business Process Improvement · Strategic Planning & Roadmapping

Technical Tools

JIRA - Advanced workflows & reporting · Confluence - Documentation & knowledge base · SQL - Complex queries & optimization · Power Automate - Approval workflows & flow automation · Microsoft 365 & Power Platform · Microsoft Azure - Cloud platforms · Figma - Design collaboration

● PROFESSIONAL EXPERIENCE

Business Analyst — **Lululemon Athletica** · 03/2020 – Present

Vancouver, Canada · Retail / E-commerce / Athleisure

- Architectural Revamp Leadership: Served as BA for an Accelerated Development project to revamp the architecture across all guest-facing pages, ensuring scalability and performance.
- Governance & Standardization: Guided the project team in following consistent patterns for Epic writing, User Story writing, and rigorous Backlog management.
- AI-Driven Product Highlights: Led the 'Product Highlights' initiative, using AI to dynamically feature trending, new, and most-gifted products, resulting in a multi-million dollar revenue impact.
- Home & Story Page Revamp: Developed new components to educate guests on popular categories and upcoming products, enhancing the 'Community Sweatlife Stories' hub.
- Strategic Partnerships: Played a key role in high-profile initiatives including the Lululemon x Olympics Team Canada Partnership and the Holiday Gift Guide revamp.
- SAFe Delivery: Authored Agile/Scrum User Stories for Web, iOS, and Services within the Scaled Agile Framework (SAFe).

Business Analyst — **Vancity** · 03/2019 – 02/2020

Vancouver, Canada · Banking / Credit Union / Financial Services

- System Migration: Acted as BA within a Scaled Agile structure for a major Commercial Banking system migration for staff and members.
- Stakeholder Management: Collaborated with internal teams and external vendors to elicit integration requirements and formulate user stories.
- Gap Analysis: Conducted thorough analysis of existing systems to understand behavior and identify critical gaps.

Business Analyst / ITQA Test Lead — **HSBC Canada** · 10/2011 – 03/2019

Vancouver, Burnaby, Canada · Banking / Financial Services / Digital Transformation

- Digital Transformation: Delivered a digital communication platform for large customer segments, achieving sustainable cost savings and a reduced carbon footprint.

- Process Improvement: Optimized business processes for Lending Systems, specifically the Credit Application and Mortgage Renewal processes.
- QA Leadership: Created Test Strategies and Plans, leading manual and automated System Integration Testing (UFT) for core banking systems.
- Core Banking: Managed requirements for system enhancements affecting customer-facing and back-office operations.
- Regulatory Compliance: Worked on FATCA Reporting and Finance Transactions Reporting.

Senior Software Engineer - Subject Matter Expert — HSBC Global Technology · 08/2005 – 03/2011

Pune, India and Burnaby, Canada · Banking / Financial Services / Enterprise Technology

- System Development: Specialized in Retail Banking Systems (CRM and Transaction Processing) on mainframe/zOS platforms for HSBC UK.
- Modernization: Delivered crucial transitional products to shift from legacy technology to future-proof, market-relevant solutions.

● KEY PROJECTS

AI-Driven Product Highlights — Machine Learning & Personalization

Led AI initiative to dynamically feature trending and personalized products using machine learning algorithms.

- Multi-million dollar revenue impact through intelligent product recommendations

- 45% increase in click-through rates on featured products
- Reduced manual merchandising effort by 70%
- Improved customer engagement and personalization

Enterprise Architecture Revamp — Scalability & Performance Optimization

Led business analysis for comprehensive architecture overhaul across all guest-facing platforms.

- Improved system scalability to handle 10x traffic growth
- Reduced page load times by 40%
- Enhanced development velocity through standardized patterns
- Future-proofed technology stack for next 5 years

Digital Banking Transformation — Paperless Communication Platform

Delivered digital communication platform for large customer segments in banking sector.

- \$500K+ annual cost savings through paperless processes
- Eliminated 2+ million sheets of paper annually
- Improved customer satisfaction by 15%
- Reduced carbon footprint significantly

● **VOLUNTEERING & COMMUNITY**

Developer — Data & Technology Team (BC) — Ismaili Council for British Columbia · 2022 – Present

- Built an Events Management System: a Drupal event-request form that triggers a Microsoft Power Automate flow, routing each submission through a two-stage approval workflow and auto-creating a calendar entry once approved — replacing a manual, email-driven process.

Volunteer — Care for the Elderly Team — Ismaili Community, British Columbia · Ongoing

- Standardized Visitation Reporting: designed a structured form for volunteers to capture details of each senior visit, then automated consolidation of submissions into a unified report using spreadsheets and Microsoft Power Automate.

● **EDUCATION**

Bachelor of Engineering — Computer Science

V.E.S.I.T, Mumbai, India (2005)

Higher Secondary Certificate — Science Stream

K. J. Somaiya College, Mumbai, India (2001)
